PROFESSIONAL SUMMARY

Results-driven Unity Game Developer with 2.5+ years of professional experience specializing in immersive 3D games, VR/AR/MR applications, and multiplayer systems. Proven track record of delivering high-quality projects for international clients including NHS (UK) and the UK Army. Expert in Unity Engine, C#, networking solutions (Netcode, Photon), and cross-platform development. Passionate about creating engaging user experiences through cutting-edge technology and innovative game design.

TECHNICAL SKILLS

Game Development

- Unity Engine (Expert) | C# .NET | Unity Netcode | Photon Networking
- VR Development (Meta Quest, HTC Vive) | AR Development | Mixed Reality (MR)
- Game Performance Optimization | Level Design | Quality Improvement

3D & Design Tools

- Maya | Blender | Photoshop | Iclone characters : Basics Clear

Programming & Frameworks

- C# | C++ | Python
- PlayFab Integration | BLE (Bluetooth Low Energy) | REST APIs | Sockets Implementation

Additional Technologies

- Git Version Control | Gradle | WebGL Deployment | Unity Version Control

- Multiplayer Networking | Client-Server Architecture
-

PROFESSIONAL EXPERIENCE

Unity Game Developer | BigVision, Mohali, India

September 2024 – Present

- Developed **MR DEMS**, a Mixed Reality application for the UK Army featuring real-time mine detection simulation with controller integration and 3D data visualization
- Created **NHS Desktop**, a comprehensive hospital simulation with VR support, server-based asset management, and 360° virtual environments for medical training
- Built **NHS Hand Washing Desktop Application** implementing WHO-approved hygiene protocols with interactive PPE training modules
- Developed **VR Game Book**, a Sikhism-themed educational VR experience featuring multiple mini-games and historical location exploration (Anandgarh Qila)

Unity Game Developer | Blocktech Brew, Chandigarh, India

March 2023 – August 2024

- Engineered **NYC Pedal Adventure** trilogy, integrating external Bluetooth cycling devices with Unity for synchronized physical-to-virtual gameplay across 3 distinct environments
- Implemented real-time BLE connectivity for hardware-software synchronization with dynamic difficulty adjustment based on physical input
- Developed **AR DINO**, an augmented reality educational game with interactive dinosaur scanning and real-time data display
- Created **Art Gallery Metaverse**, a dynamic virtual museum with API-driven content management system
- Built **Virtual Port Metaverse**, simulating real-time container logistics and maritime operations
- Developed **Mahabharat-themed racing game** featuring cultural storytelling elements and complex AI behaviors
- Designed and implemented multiplayer networking systems using Unity Netcode during internship period

Key Achievements:

- Successfully delivered 10+ projects for international clients (USA, UK)
- Integrated external hardware devices with Unity via Bluetooth for innovative gameplay mechanics
- Implemented dynamic content systems using client-provided APIs

- Optimized game performance for VR/AR platforms ensuring smooth 90+ FPS
-

EDUCATION

Bachelor of Technology in Computer Science Engineering

Maharaja Agrasen Institute of Technology, Maharaja Agrasen University

2019 – 2023 | **CGPA: 8.4/10**

Senior Secondary (XII) - Non-Medical

GSS School, Baddi | Himachal Pradesh Board

2018 – 2019 | **63%**

Secondary (X)

Nav Jyoti Century School | CBSE

2016 – 2017 | **CGPA: 8.6/10**

CERTIFICATIONS & COURSES

Google IT Support Course | Internshala.com | *August 2022 – December 2022*

- Completed comprehensive IT fundamentals and support training

Web Development Full Course | Internshala.com | *August 2022 – December 2022*

- Frontend + Backend development (HTML, CSS, JavaScript, Node.js)
-

KEY PROJECTS

VR Game Book | *November 2024 – January 2025*

- Sikhism-themed educational VR game with multiple interactive mini-games
- Features: Animal feeding, cannon shooting, fruit slicing, archery challenges
- Full 3D recreation of historical Anandgarh Qila for immersive cultural exploration

MR DEMS (Mixed Reality) | *June 2024 – Ongoing*

- MR desktop application for UK Army mine detection training
- Network-synchronized controller and MR headset integration

- Real-time 3D visualizations and data analytics for mine identification

NHS Hospital Simulation Suite | 2024

- VR-enabled hospital training environments (OT, ICU, medical rooms)
- Server-based asset positioning system for multi-user collaboration
- Interactive hand-washing training module based on NHS guidelines

NYC Pedal Adventure Series | August 2023 – February 2024

Phase 1: Central Park Experience - Virtual cycling through NYC landmarks **Phase 2: Cityscape Racing** - AI opponent racing with dynamic difficulty **Phase 3: Jungle Racing** - Survival mechanics with haptic feedback and adaptive resistance

- Bluetooth device integration for real-world cycling synchronization
- Dynamic difficulty adjustment based on physical performance
- Immersive environmental feedback (vibrations, resistance changes)

AR DINO | October 2023 – June 2024

- Augmented Reality educational game with dinosaur scanning
- Real-time information display (species, age, height, facts)
- Interactive 3D models with smooth AR tracking

Metaverse Projects

- **Art Gallery:** Dynamic API-driven virtual museum with real-time content updates
- **Virtual Port:** Realistic seaport simulation with container logistics
- **Mahabharat Racing:** Cultural gaming experience with epic storytelling

LANGUAGES

- **English** - Fluent
- **Hindi** - Native
- **Punjabi** - Native
